

## Perfumes/Scents

There are a significant number of people here at SPHS who are at risk for having potentially dangerous reactions to inhaling strong perfumes and other scents. When perfumes are sprayed, these people may inhale tiny airborne droplets, causing them very serious breathing difficulties, requiring dismissal from school. For their safety, we are asking that everyone please be very careful to refrain from spraying any perfumes inside of SPHS. In addition, it would be very helpful if those applying scents at home used as light a touch as possible. Thanks for your co-operation in keeping our school healthy.
